

## **Rimrock Environmental Policy**

The management and staff of the *Rimrock Resort Hotel* are committed to the preservation of our environment. Recognizing the responsibility we have both locally and globally, we have developed a number of programs to *Reduce, Reuse and Recycle* wherever possible - from energy-efficient lighting, to water conservation systems, naturalized landscaping and an extensive recycling program, to name a few. We encourage all stakeholders to help us preserve our environment by participating in our Green Key Eco Program.

We believe that our corporate responsibility goes beyond our proprietary borders and we endeavour to cooperate with our neighbours and our suppliers in order to conduct our business in a manner that respects the environment. Every effort will be made to conserve resources throughout our operations.

The Rimrock Resort Hotel is working towards continued improvement in the development of programs designed to minimize environmental impacts generated from our activities, products and services.

We will

- ❖ Endeavour to go beyond the normal regulations and standards in the industry;
- ❖ Lead by example;
- ❖ Purchase local products where possible;
- ❖ Support pollution prevention and minimization programs in the workplace;
- ❖ Use energy efficient equipment and procedures;
- ❖ Consistently address ways to reduce our Carbon Footprint;
- ❖ Foster relationships with our community, suppliers, contractors, government agencies, and other organizations engaged in improving the environment;
- ❖ Review environmental objectives and practices on a yearly basis and monitor performance so that we can properly assess our strengths and weaknesses, and address them accordingly;
- ❖ Avoid the perception of “green washing.”

The Rimrock’s Environmental Policy will always be readily available to employees, guests, and community stakeholders. The growth of the Rimrock depends on the willingness of everyone involved to act responsibly – for the sake our own future.
